Resilience®

EXCEPTIONAL MOISTURE RESISTANCE

Lifetime Limited Warranty Against Peeling and Blistering.

Rain or dew in the forecast is no problem—Resilience lets you paint with confidence.

Resilience is formulated with MoistureGuard™ Technology, so newly painted exteriors develop resistance to moisture in just two hours rather than the four-hour minimum most coatings require. You can paint later in the day with confidence and less concern about dew or impending rain. Resilience is the perfect choice for residential exteriors no matter what the forecast.

Resilience is a 100% acrylic coating and delivers outstanding hide and durability in wet or dry climates. It can be tinted in VinylSafe® Paint Colors — allowing you the freedom to choose from 100 color options, including a limited selection of darker colors formulated to resist warping or buckling when applied to a sound, stable vinyl substrate. See VinylSafe® color palette for colors that can be used. It can be applied in temperatures as low as 35°F. Brush, roll or spray it on properly prepared masonry, concrete, steel, stucco and wood.

Apply 2 coats of Resilience for residential repaints;
a primer and topcoat for new construction.

SuperPaint

EXTERIOR ACRYLIC LATEX

Lifetime Limited Warranty Against Peeling and Blistering.

Rely on SuperPaint® Exterior Latex Paint for exceptional performance and protection against the elements.

Formulated with Advanced Resin Technology, SuperPaint delivers outstanding adhesion, coverage and hide, as well as time-tested durability. This dirt/mildew-resistant paint guards against frost in cooler weather and resists chalking, peeling and blistering in hot and humid conditions. No matter the environment, SuperPaint provides lasting quality.

With paint and primer in one formula, this coating offers fast, efficient application that boosts efficiency, minimizes repaints and can help reduce costs. Available in a range of sheens, most of which may be applied in temperatures as low as 35°F. SuperPaint can also be tinted in VinylSafe® Paint Colors — allowing you the freedom to choose from 100 color options, including a limited selection of colors formulated to resist warping or buckling when applied to a sound, stable vinyl substrate. See VinylSafe® color palette for colors that can be used.
